

# MRC 2011

Deadline extended:

Abstracts due: July 03, 2011

Papers due: July 10, 2011

Seventh International Workshop

## Modeling and Reasoning in Context

CONTEXT 2011, Karlsruhe, Germany, September 26-30, 2011

Context sensitive processing plays a key role in a wide variety of modern IT applications. Context awareness and context-based reasoning are essential not only for mobile and ubiquitous computing, but also for a wide range of other areas such as collaborative software, web engineering, personal knowledge and information management, information sharing, adaptive games, health care workflow and patient control, and e-Learning solutions.

MRC aims to provide a forum for scientists and practitioners exploring modelling and reasoning issues and approaches for context sensitive systems, from a broad range of areas, to share their problems and techniques across different research and application areas.

The MRC workshop series, established in 2004, provides a forum to exchange and discuss issues and ideas in a cooperative, friendly environment.

### Chairs

**Jörg Cassens**  
Institute for Multimedia  
and Interactive Systems  
University of Lübeck  
Lübeck, Germany

**Rebekah K. Wegener**  
Centre for Language  
in Social Life  
Macquarie University  
Sydney, Australia

**Anders Kofod-Petersen**  
SINTEF Information and  
Communication Technology  
Trondheim, Norway

### Dates

|               |                 |
|---------------|-----------------|
| Abstracts due | July 3          |
| Submissions   | July 10         |
| Notification  | August 4        |
| Camera-ready  | August 18       |
| CRC updates   | August 25       |
| MRC Workshop  | September 26-27 |
