

## Eighth International Workshop **Modelling and Reasoning in Context (MRC)**

ECAI 2016, The Hague, The Netherlands, 29 Aug - 02 Sep 2016

Paper Deadline: 14 Jun 2016 (some paper types: 18 Jun)

### Join us at MRC 2016

Context sensitive processing plays a key role in a wide variety of modern IT applications. Context awareness and context-based reasoning are essential not only for mobile systems, ambient computing and the internet of things, but also for a wide range of other areas such as collaborative software, web engineering, personal knowledge and information management, information sharing, adaptive games, health care workflow and patient control, and e-Learning solutions.

MRC aims to provide a forum for scientists and practitioners exploring modelling and reasoning issues and approaches for context sensitive systems, from a broad range of areas, to share their problems, techniques and solutions across different research and application areas.

### Chairs

**Jörg Cassens**  
IMAI, University of Hildesheim,  
Germany

**Rebekah Wegener**  
RWTH Aachen University, Germany  
and Audaxi, Sydney, Australia

**Anders Kofod-Petersen**  
Alexandra Institute,  
Copenhagen, Denmark  
and NTNU, Trondheim, Norway

### Dates

Papers due	June 14
Notification	June 28
Camera-ready	July 18
MRC Workshop	August 30
