

11th International Workshop Modelling and Reasoning in Context **MRC 2020 – Human-Centric and Contextual Systems**

Held as a virtual workshop at the virtual ECAI 2020

Workshop date: Saturday, August 29, 2020

Paper deadline: see website

Join us @ECAI

MRC aims to bring together scientists and practitioners from different communities, both industry and academia, in order to study, understand, and explore issues surrounding context and to share challenges, techniques and success stories across different research and application areas in a cooperative, friendly environment.

We invite papers on different aspects of context, for example on modelling of and reasoning with context, or on the role of context in applications. This year we focus on personalization, autonomy and privacy in relation to context. We explicitly invite contributions from other fields in order to further trans- and interdisciplinary approaches.

A balanced mix of peer reviewed paper presentations, organised panel discussions, industry input, and open discussion time should make the workshop a dynamic and attractive venue.

Chairs

Jörg Cassens

University of Hildesheim, Germany

Rebekah Wegener

University of Salzburg, Austria
and Audaxi, Sydney, Australia

Anders Kofod-Petersen

Alexandra Institute,
Copenhagen, Denmark
and NTNU, Trondheim, Norway

Dates
